📍 Karnataka, India

Professional Summary

Computer Science undergraduate at KLE Technological University with experience in full-stack web development, machine learning, and embedded systems. Skilled in C, C++, Java, JavaScript, React.js, Node.js, SQL, and Arduino-based automation. Passionate about building practical software solutions and solving real-world problems through technology.

Education

Bachelor of Engineering in Computer Science 2024 – 2028

KLE Technological University, Dr. M. S. Sheshgiri Campus, Belagavi

Technical Skills

- **Programming Languages:** C, C++, Java, JavaScript
- **Web Development:** HTML, CSS, React.js, Node.js, Express.js, REST APIs
- **Databases** **Cloud:** SQL, Supabase
- **Tools** **Platforms:** Git, GitHub, Linux, Arduino Mega 2560, Agora RTC
- **Core Concepts:** Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Machine Learning Fundamentals

Relevant Coursework

Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Probability and Statistics

Projects

KLE Connect – College Companion Platform 2025

Tech Stack: React.js, Supabase, Gemini API, Agora RTC

- Developed a student collaboration platform with authentication, campus resources, and study planning tools.
- Implemented real-time communication using Supabase Realtime.
- Integrated an AI-powered tutor using Google Gemini API.
- Built virtual study rooms using Agora RTC.

Food Ordering System 2026

Tech Stack: React.js, Node.js, Express.js, SQL

- Developed a full-stack food ordering application with restaurant and menu management features.
- Implemented user authentication and role-based access functionality.
- Designed responsive user interfaces and integrated backend APIs.
- Managed database operations for users, orders, and menu items.

Digital Memory Capsule

2026

Tech Stack: React.js, Node.js, Express.js, SQL

- Developed a platform that allows users to securely store memories and unlock them at a future date.
- Implemented authentication and personalized memory management features.
- Designed responsive interfaces for creating and accessing digital capsules.
- Integrated backend APIs and database storage for secure data management.

Wood Log Quality and Age Prediction

2025 – Present

Tech Stack: Machine Learning, Signal Processing

- Developing a predictive model to estimate wood log quality and age using vibration and sound-wave data.
- Processing acoustic and vibration datasets collected from wood samples.
- Performing feature extraction, model training, and evaluation.

Pothole Detection System

2026

Tech Stack: Machine Learning, Computer Vision

- Developed a machine learning model for pothole detection using road surface image datasets.
- Performed data preprocessing and model evaluation.
- Improved detection accuracy through iterative training and dataset refinement.

Bluetooth Controlled Folding Garage Door System

2024

Tech Stack: Arduino Mega 2560, Bluetooth, Embedded Systems

- Designed and developed an automated folding garage door system.
- Implemented Bluetooth-based smartphone control for remote operation.
- Developed motor control logic for automated opening and closing.
- Applied embedded systems concepts for reliable automation.

Interests

- Full-Stack Development
- Embedded Systems and IoT
- Machine Learning
- Software Engineering
- Fitness and Gym Training
